

Counterfeit, Fraudulent and Suspect Items Policy

At the British Electrical & Manufacturing Company Limited (BEMCO LTD), safety is our overriding priority and we regard the co-operation of our supply chain as essential to maintaining the highest standards for all the products we supply.

We understand the potential risks concerning the supply of Counterfeit, Fraudulent and Suspect Items (CFSI) and to this end we only use suppliers that can demonstrate the quality and source of the materials we require.

All products are manufactured on-site, using materials from approved suppliers, to approved processes and under closely monitored conditions. Product is inspected and any non-compliance is reviewed and material/components rejected, where appropriate.
